END USER LICENSE AGREEMENT

IMPORTANT, READ CAREFULLY. THIS END USER LICENSE AGREEMENT ("AGREEMENT") IS A LEGAL AGREEMENT BETWEEN YOU AND TRIMBLE INC. ("Trimble") and applies to the computer software provided by Trimble with Earthworks (the "Product") purchased by you (whether built into hardware circuitry as firmware, embedded in flash memory or a PCMCIA card, or stored on magnetic or other media), or provided as a stand-alone computer software product, and includes any accompanying printed materials and any "online" or electronic documentation ("Software"). The Software also includes any software, (including, without limitation, upgrades and updates) relating to the Product that is furnished by Trimble or its dealers (including, without limitation, Trimble software downloaded from Trimble's or its dealers' website(s)) unless accompanied by different license terms and conditions that will govern its use. BY CLICKING "YES" OR "I ACCEPT" IN THE ACCEPTANCE BOX, OR BY INSTALLING, COPYING OR OTHERWISE USING THE SOFTWARE, YOU AGREE TO BE BOUND BY THE TERMS OF THIS AGREEMENT. IF YOU ARE ENTERING INTO THIS AGREEMENT ON BEHALF OF A COMPANY OR OTHER LEGAL ENTITY, YOU REPRESENT THAT YOU ARE AUTHORIZED TO BIND THAT COMPANY OR LEGAL ENTITY TO THIS AGREEMENT. IF YOU DO NOT HAVE SUCH AUTHORITY OR ARE UNWILLING OR UNABLE TO BE BOUND BY THIS AGREEMENT, DO NOT CLICK "I ACCEPT" AND DO NOT ACCESS OR USE THE PRODUCT OR SOFTWARE. IF YOU DO NOT AGREE TO THE TERMS OF THIS AGREEMENT, DO NOT USE THE PRODUCT OR THE SOFTWARE. INSTEAD PROMPTLY RETURN THE UNUSED PRODUCT OR SOFTWARE TO THE PLACE FROM WHICH YOU OBTAINED THEM FOR A FULL REFUND. This Software is protected by copyright laws and international copyright treaties, as well as other intellectual property laws and treaties. The software is licensed, not sold.

1 SOFTWARE PRODUCT LICENSE

1.1 – License Grant. Subject to this Agreement, Trimble grants you a limited, non-exclusive, non-sublicensable right to use one (1) copy of the Software in a machine-readable form on the Product. Such use is limited to use with the Product for which it was intended and into which it was embedded. You may use the installation Software from a computer solely to download the Software to one Product. In no event shall the installation Software be used to download the Software onto more than one Product without securing a separate license. A license for the Software may not be shared or used concurrently on different computers or Products.

1.2 - Other Rights and Limitations.

(1) You may not copy, modify, make derivative works of, rent, lease, sell, distribute or transfer the Software, in whole or in part, except as otherwise expressly authorized under this Agreement, and you agree to use all commercially reasonable efforts to prevent its unauthorized use and disclosure.

(2) The Software contains valuable trade secrets proprietary to Trimble and its licensors. To the extent permitted by relevant law, you shall not, nor allow any third party to copy, decompile, disassemble or otherwise reverse engineer the Software, or attempt to do so, provided, however, that to the extent any applicable mandatory laws (such as, for example, national laws implementing EC Directive 91/250 on the Legal Protection of Computer Programs) give you the right to perform any of the aforementioned activities without Trimble's consent in order to gain certain information about the Software for purposes specified in the respective statutes (i.e., interoperability), you hereby agree that, before exercising any such rights, you shall first request such information from Trimble in writing detailing the purpose for which you need the information. Only if and after Trimble, at its sole discretion, partly or completely denies your request, may you exercise such statutory rights.

(3) This Software is licensed as a single product. You may not separate its component parts for use on more than one Product.

(4) You may not rent, lease, or lend, the Software separate from the Product for which it was intended.

(5) No service bureau work, multiple-user license or time-sharing arrangement is permitted. For purposes of this Agreement "service bureau work" shall be deemed to include, without limitation, use of the Software to process or to generate output data for the benefit of, or for purposes of rendering services to any third party over the Internet or other communications network.

(6) You may permanently transfer all of your rights under this Agreement only as part of a permanent sale or transfer of the Product for which it was intended, provided you retain no copies, you transfer all of the Software (including all component parts, the media and printed materials, any upgrades, and this Agreement) and the recipient agrees to the terms of this Agreement, if the Software portion is an upgrade, any transfer must include all prior versions of the Software.

(7) You acknowledge that the Software and underlying technology may be subject to the export administration regulations of the United States Government relating to the export of technical data and products. This Agreement is subject to, and you agree to comply with, any laws, regulations, orders or other restrictions on the export of the Software from the United States which may be imposed by the United States Government or agencies thereof.

(8) At the request of Trimble, you agree to cooperate with Trimble to track the number of Products using Software at your site(s) to ensure compliance with the license grant and installation restrictions in this Agreement.

(9) Notwithstanding anything to the contrary in this Agreement, any Open Source Software that may be included as a part of the software package shall not constitute a portion of the Software as defined in this Agreement and is not licensed under the terms of this Agreement, but instead is subject to the terms of the applicable Open Source Software license. If required, Trimble has provided the license or notice statement for the applicable Open Source Software and such license or notice statement is accessible through the user interface for the Product. Unless otherwise required pursuant to the terms of an Open Source Software license, Trimble grants you no right to receive source code to the Open Source Software; however, in some cases rights and access to source code may be available to you directly from the licensors. If you are entitled to receive the source code from Trimble for any Open Source Software included with the software package, you may obtain the source code at no charge by written request to Trimble at 5475 Kellenburger Rd., Dayton, Ohio 45424 USA, Attn: Earthworks Products Manager. You must agree to the terms of the applicable Open Source Software license, or you may not use the subject Open Source Software.

For purposes of this Agreement, "Open Source Software" means those software programs or libraries that are identified in the software documentation, read me and/or about files as being subject to any open source software license, and all modifications, derivative works and executables based on or derived from such software programs or libraries, if such modifications, derivative works and/or executables are also subject to the applicable open source software license by its terms.

(10) Use of both the Product and Software is subject to the terms of user manuals, technical manuals and any other materials provided by Trimble, or their licensors and/or suppliers, in printed, electronic or other form, that describe the installation, operation, use or technical specifications of the Product and/or Software (the "Documentation"). Without limiting the generality of the foregoing, the Documentation shall include the installation manual (a copy of which is viewable at [<https://community.trimble.com/community/partners/cec>]). The Documentation and the terms in it are hereby incorporated into this Agreement by reference. By installing and/or using the Product or Software, you hereby certify that you have reviewed the Documentation, have received the necessary notice of the terms contained in it, and agree to be bound by it.

1.3 – Termination. You may terminate this Agreement by ceasing all use of the Software. Without prejudice as to any other rights, Trimble may terminate this Agreement without notice if you fail to comply with the terms and conditions of this Agreement. In either event, you must destroy all copies of the Software and all of its component parts, and provide an affidavit to Trimble stating that you have done the same.

1.4 – Copyright. All title and copyrights in and to the Software (including but not limited to any images, photographs, animations, video, audio, music, and text incorporated into the Software), the accompanying printed materials, and any copies of the Software are owned by Trimble and its licensors. You shall not remove, cover or alter any of Trimble's patent, copyright or trademark notices placed upon, embedded in or displayed by the Software or on its packaging and related materials. You may, however, either (1) make one copy of the

Software solely for backup or archival purposes, or (2) install the Software on a single computer provided you keep the original solely for backup or archival purposes. You may not copy the accompanying printed materials.

1.5 – U.S. Government Restricted Rights. Use, duplication, or disclosure by the United States Government is subject to restrictions as set forth in this Agreement, and as provided in DFARS 227.7202-1(a) and 227.7202-3(a) (1995), DFARS 252.227-7013(c)(1)(ii) (OCT 1988), FAR 12.212(a) (1995), FAR 52.227-19, or FAR 52.227-14(alt III), as applicable.

2 LIMITED WARRANTY

2.1 - Limited Warranty. Trimble warrants that the Software will perform substantially in accordance with the accompanying written materials for a period of one (1) year from the date of receipt. This limited warranty gives you specific legal rights, you may have others, which vary from state/jurisdiction to state/jurisdiction.

2.2 - Customer Remedies. Trimble 's and its licensors' entire liability, and your sole remedy, with respect to the Software shall be either, at Trimble 's option, (a) repair or replacement of the Software, or (b) return of the license fee paid for any Software that does not meet Trimble 's limited warranty. This limited warranty is void if failure of the Software has resulted from (1) accident, abuse, or misapplication; (2) alteration or modification of the Software without Trimble's prior written authorization; (3) interaction with software or hardware not supplied by Trimble; (4) improper, inadequate or unauthorized installation, maintenance, or storage of the Software or Product; or (5) if you violate the terms of this Agreement. Any replacement Software will be warranted for the remainder of the original warranty period or thirty (30) days, whichever is longer.

2.3 – NO OTHER WARRANTIES. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, TRIMBLE AND ITS LICENSORS DISCLAIM ALL OTHER WARRANTIES AND CONDITIONS, EITHER EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NONINFRINGEMENT WITH REGARD TO THE SOFTWARE AND THE PROVISION OF OR FAILURE TO PROVIDE SUPPORT SERVICES. THE ABOVE LIMITED WARRANTY DOES NOT APPLY TO ERROR CORRECTIONS, UPDATES OR UPGRADES OF THE SOFTWARE AFTER EXPIRATION OF THE LIMITED WARRANTY PERIOD, WHICH ARE PROVIDED "AS IS" AND WITHOUT WARRANTY. BECAUSE THE SOFTWARE IS INHERENTLY COMPLEX AND MAY NOT BE COMPLETELY FREE OF NONCONFORMITIES, DEFECTS OR ERRORS, YOU ARE ADVISED TO VERIFY YOUR WORK. TRIMBLE DOES NOT WARRANT THE RESULTS OBTAINED THROUGH USE OF THE SOFTWARE, OR THAT THE SOFTWARE WILL OPERATE ERROR FREE OR UNINTERRUPTED, WILL MEET YOUR NEEDS OR EXPECTATIONS, OR THAT ALL NONCONFORMITIES CAN OR WILL BE CORRECTED. TO THE EXTENT ALLOWED BY APPLICABLE LAW, IMPLIED WARRANTIES AND CONDITIONS ON THE SOFTWARE ARE LIMITED TO ONE (1) YEAR. YOU MAY HAVE OTHER LEGAL RIGHTS WHICH VARY FROM STATE/JURISDICTION TO STATE/JURISDICTION.

2.4 – LIMITATION OF LIABILITY. TRIMBLE'S ENTIRE LIABILITY UNDER ANY PROVISION OF THIS AGREEMENT SHALL BE LIMITED TO THE GREATER OF THE AMOUNT PAID BY YOU FOR

THE SOFTWARE LICENSE OR U.S. \$25.00. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL TRIMBLE OR ITS LICENSORS BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES WHATSOEVER (INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION, LOSS OF BUSINESS INFORMATION, OR ANY OTHER PECUNIARY LOSS) ARISING OUT OF THE USE OR INABILITY TO USE THE SOFTWARE, OR THE PROVISION OF OR FAILURE TO PROVIDE SUPPORT SERVICES, EVEN IF TRIMBLE HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. BECAUSE SOME STATES AND JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, THE ABOVE LIMITATION MAY NOT APPLY TO YOU. THE LIMITATIONS SET FORTH IN SECTION 2.4 SHALL APPLY EVEN IF THE LICENSEE'S REMEDIES UNDER THIS AGREEMENT FAIL OF THEIR ESSENTIAL PURPOSE

3 INFORMATION PROVIDED BY YOU FOR 'CONNECTED' FEATURES

The Software is designed to enable certain connected features, such as virtual reference station ("VRS") and Internet base station service ("IBSS") corrections, file sync (for design files, user preferences, Product firmware updates, etc.), 3D productivity services, and connected site services provided by others ("Connected Services"). Please refer to the Software documentation for additional information about Connected Services supported by the Software. You must separately obtain the right to access and use Connected Services, e.g., by maintaining a current subscription for the relevant services. To enable Connected Services, the Software may collect and/or receive data and information (the "Connected Information") relating to your Product and the equipment on which your Product is installed (your "Equipment"), including without limitation:

- Geolocation and 3D position
- Status (including configuration and operation)
- Equipment progress and activity
- VRS and IBSS correction information
- File sync and GNSS data
- Operator Key

The Connected Information may be transferred to your Connected Services providers through the networking and telematics systems installed on your Equipment (whether utilizing cellular, satellite, local area networks, ethernet or other similar systems, the "Telematics System") or manual file transfer (e.g., USB). The actual Connected Information collected and received will vary based on, among other things, the configuration of your Product and Equipment (including your Telematics Systems) and the related Connected Services that you separately elect to access and use. Please carefully review any agreements and documentation relating to such Connected Services to understand how the Connected Service provider may store and use the Connected Information.

In addition, Trimble or its affiliated companies may collect, store and receive data and information ("User Information") relating to your use of the Software, Product and Equipment, including without limitation:

- Device/Company Identity Data includes machine ID, machine sensor configuration, and software configuration
- Location includes Global Navigation Satellite System and beacon-based location
- Analytics Data includes Software versions, display model, stack trace system configuration, current design, features in use, time in each screen, button pushes, and Software bug and crash reports.

The actual User Information collected and received will vary based on, among other things, the configuration of your Product and Equipment and the related product(s) that you separately elect to access and use. You acknowledge and agree that Trimble or its affiliated companies may, directly or indirectly through the services of third parties, use User Information for its internal business purposes, including but not limited to: (i) making the Software and Products available and providing services to you; (ii) improving the performance of the Software and Products, researching and developing updates and other products and services, and analyzing adoption and usage of the Software and Products; and (iii) verifying your compliance with the terms of this Agreement and enforcing Trimble's rights, including all intellectual property rights in and to the Software and the Product(s). In order to provide you with the full range of benefits made possible by the Product(s) and our services, and in connection with the uses described above, Trimble may share the User Information with its affiliated companies. The affiliated companies may use the User Information for their own internal purposes in a manner consistent with the uses described above. Trimble and its affiliated companies may also disclose User Information if we have a good faith belief that (1) the disclosure is necessary or useful to our provision of services; (2) the disclosure is necessary to protect our rights, interests, or property; (3) the disclosure is necessary or useful to protect your safety or the safety of others, to investigate fraud, or to respond to a government request; (4) the disclosure is required by law, such as to comply with a subpoena, search warrant, court order, or similar legal or administrative process; or (5) Trimble or its affiliated company is or will be purchased or otherwise acquired, in which User Information will likely be among the assets transferred. Trimble and its affiliated companies and third parties acting on Trimble's or its affiliate's behalf may analyze User Information to analyze and create performance metrics, collect and evaluate other information relating to the Software and Product(s), and track anonymized and technical information to improve the Software and Product(s) ("Machine Performance Data"). Any information Trimble or its affiliated companies track in this manner is anonymous and limited to usage and volume statistics. Trimble and its affiliated companies may make the Machine Performance Data commercially available to third parties to the extent that it is aggregated or otherwise de-identified so that it cannot be used to identify you. By accepting this Agreement, you acknowledge and agree to the collection and use of the Connected Information, User Information and Machine Performance Data as provided above.

The Software may also automatically provide Software bug and crash reports via your Equipment's Telematics Systems to Trimble or its vendors for purposes of maintaining, supporting, or improving the Software.

You may incur additional charges for the transfer of Connected Information, User Information and Machine Performance Data, or Software bug and crash reports by your telecommunications service providers or your Connected Services providers, as applicable.

4 GENERAL

4.1 – This Agreement shall be governed by the laws of the State of California and applicable United States Federal law without reference to “conflict of laws” principles or provisions. The United Nations Convention on Contracts for the International Sale of Goods will not apply to this Agreement. Jurisdiction and venue of any dispute or court action arising from or related to this Agreement or the Software shall lie exclusively in or be transferred to the courts located in Santa Clara County, California, and/or the United States District Courts for California. You hereby consent and agree not to contest, such jurisdiction, venue and governing law.

4.2 - Notwithstanding Section 4.1, if you acquired the Product in Canada, this Agreement is governed by the laws of the Province of Ontario, Canada. In such case each of the parties to this Agreement irrevocably attorns to the jurisdiction of the courts of the Province of Ontario and further agrees to commence any litigation that may arise under this Agreement in the courts located in the Judicial District of York, Province of Ontario.

4.3 - Official Language. The official language of this Agreement and of any documents relating thereto is English. For purposes of interpretation, or in the event of a conflict between English and versions of this Agreement or related documents in any other language, the English language version shall be controlling.

4.4 - Trimble reserves all rights not expressly granted by this Agreement.

Compliance notices

3.1 FCC — US FCC regulations

The following statement applies to these devices:

- EC520 electronic control module (FCC ID: K7T-WIFIHU2S and FCC ID: TLZ-NM230NF)
- TD5x0 display (FCC ID: TLZ-NM230NF)
- BT510 Bluetooth® module (FCC ID: K7T-WIFIHU2S)
- GS520 grade sensor
- GS510 grade sensor
- AA510 audible alarm
- CI510 CAN interface
- CI520 CAN interface

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

3.2 Canadian license-exempt RSS standards

The following statement applies to these devices:

- EC520 electronic control module (IC: 2377A- WIFIHU2S and IC: 6100A- NM230NF)
- TD5x0 display (IC: 6100A- NM230NF)
- BT510 Bluetooth® module (IC: 2377A- WIFIHU2S)

- GS520 grade sensor
- GS510 grade sensor
- AA510 audible alarm
- CI510 CAN interface
- CI520 CAN interface

3.2.1 CAN ICES-3 (B)/NMB-3(B)

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

1. This device may not cause interference, and;
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme avec Industrie Canada RSS standard exempts de licence (s). Son fonctionnement est soumis aux deux conditions suivantes:

1. Cet appareil ne peut pas provoquer d'interférences; et
2. Cet appareil doit accepter toute interférence, y compris les interférences pouvant entraîner un mauvais fonctionnement de la appareil.

3.3 € — European Union CE compliance

The following statement applies to these devices:

- EC520 electronic control module
- TD5x0 display
- GS520 grade sensor
- GS510 grade sensor
- BT510 Bluetooth® module
- AA510 audible alarm
- CI510 CAN interface
- CI520 CAN interface
- VM510 valve module

These devices are compliant with the following Directives and standards

- Machinery 2006/42/EC
- RoHS 2015/863/EU
- EN 13766-1:2018

The EC520 electronic control module and the TD5x0 display are also compliant with the following additional Directives and standards:

- Radio Equipment Directive 2014/53/EU
- IETSI EN 300-328 V2.2.2
- ETSI EN 301-489-1 V2.2.3
- ETSI EN 301-489-17 V3.2.4

3.4 — European Union recycling compliance

These products comply with the WEEE Directive 2012/19/EU. For recycling in Europe call:

+31 479 53 24 30

To request instructions by writing:

Trimble Europe BV

C/O Menlo Worldwide Logistics

Meerheide 45

5521 CZ Eersel, NL

3.5 — Australian and New Zealand EN 55032 compliance

AS/NZS 55032 compliance applies to these devices:

- EC520 electronic control module
- TD5x0 display
- GS520 grade sensor
- AA510 audible alarm
- CI510 CAN interface
- CI520 CAN interface

3.6 — Japan Radio Type Approval

Construction Design Certificates apply to these devices:

- EC520 electronic control module (R 208-160089)
- TD5x0 display (R 201-163179 and T D160253201)

3.7 — RoHS Statement

This device conforms to RoHS (Reduction Of Hazardous Substances) European Union regulations that set maximum concentration limits on hazardous materials used in electrical and electronic equipment.

CAUTION: RISK OF EXPLOSION IF BATTERY IS DISPOSED OF INCORRECTLY. DISPOSE OF THE DEVICE AND THE BATTERY ACCORDING TO INSTRUCTIONS FOR ELECTRONIC WASTE.

3.8 Taiwan

低功率電波輻射性電機管理辦法

第十二條：經型式認證合格之低功率射頻電機，非經許可，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性及功能。

第十四條：低功率射頻電機之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方得繼續使用。低功率射頻電機需忍受合法通信或工業、科學及醫療用電波輻射性電機設備之干擾。

SAR 標準值 2.0W/Kg，送測產品實測值為 0.545w/Kg

Safety information

Most accidents that involve product operation, maintenance and repair are caused by failure to observe basic safety rules or precautions. An accident can often be avoided by recognizing potentially hazardous situations before an accident occurs. A person must be alert to potential hazards. This person should also have the necessary training, skills and tools to perform these functions properly.

Improper operation, lubrication, maintenance or repair of this product can be dangerous and could result in injury or death.

Do not operate or perform any lubrication, maintenance or repair on this product, until you have read and understood the operation, lubrication, maintenance and repair information.

Safety precautions and warnings are provided in this manual and on the product. If these hazard warnings are not heeded, bodily injury or death could occur to you or to other persons.

The hazards are identified by the "Safety Alert Symbol" and followed by a "Signal Word" such as "DANGER", "WARNING" or "CAUTION". The Safety Alert "WARNING" label is shown below.

WARNING –This alert warns of a potential hazard which, if not avoided, can cause severe injury.

The meaning of this safety alert symbol is as follows:

Attention! Become Alert! Your Safety is Involved.

The message that appears under the warning explains the hazard and can be either written or pictorially presented.

Operations that may cause product damage are identified by "NOTICE" labels on the product and in this publication.

Trimble cannot anticipate every possible circumstance that might involve a potential hazard. The warnings in this publication and on the product are, therefore, not all inclusive. If a tool, procedure, work method or operating technique that is not specifically recommended by Trimble is used, you must satisfy yourself that it is safe for you and for others. You should also ensure that the product will not be damaged or be made unsafe by the operation, lubrication, maintenance or repair procedures that you choose.

The information, specifications, and illustrations in this publication are on the basis of information that was available at the time that the publication was written. The specifications, torques, pressures, measurements, adjustments, illustrations, and other items can change at any time. These changes can affect the service that is given to the product. Obtain the complete and most current information before you start any job. Dealers have the most current information available.

4.1 Laser Safety

As with any bright light source, such as the sun, electric welding arcs or arc lamps, common sense applies:

- DO NOT look into the laser aperture when the laser is on.
- Viewing laser output with telescopic optical instruments (for example, telescopes and binoculars) may pose an eye hazard.
- Do not remove any warning signs from the laser.
- Use of a laser transmitter by personnel that are not trained on the product may result in exposure to hazardous laser light.

For further information regarding safe use of lasers, refer to the IEC 60825-1 2007, or the manufacturer's documentation supplied with your laser transmitter.

4.2 Magnet Safety

The neodymium magnets supplied with the magnetic display mount are very strong. Handling them with care is necessary to prevent personal injuries, and property damage:

- Pacemakers may be damaged or switch to "Test Mode" in the presence of a strong magnetic force. If a pacemaker is in use, keep a minimum of 30 cm (1 foot) distance.
- Be extremely careful when handling the magnets near other magnets or ferrous metal. Losing control of a magnet may result in damage to intervening objects, such as a finger or a cab window.
- Do not remove any warning signs from the magnets.
- The strong magnetic fields of the magnets can damage electronic devices such as hearing aids, items that rely on magnetic storage media such as credit cards, bank cards, and computers, and items containing ferromagnetic components such as mechanical watches.

4.3 Crushing prevention and cutting prevention

Support the equipment properly when you work beneath the equipment. Do not depend on the hydraulic cylinders to hold up the equipment. An attachment can fall if a control is moved, or if a hydraulic line breaks.

Unless you are instructed otherwise, never attempt adjustments while the machine is moving. Also, never attempt adjustments while the engine is running.

Whenever there are attachment control linkages, the clearance in the linkage area will increase or the clearance in the linkage area will decrease with movement of the attachment. Stay clear of all rotating and moving parts.

Keep objects away from moving fan blades. The fan blade will throw objects or cut objects.

Do not use a kinked wire cable or a frayed wire cable. Wear gloves when you handle wire cable.

When you strike a retainer pin with force, the retainer pin can fly out. The loose retainer pin can injure personnel. Make sure that the area is clear of people when you strike a retainer pin. In order to avoid injury to your eyes, wear protective glasses when you strike a retainer pin.

Chips or other debris can fly off objects when you strike the objects. Make sure that no one can be injured by flying debris before striking any object.

4.4 Operation

Clear all personnel from the machine and from the area.

Clear all obstacles from the machine's path. Beware of hazards (wires, ditches, etc).

Be sure that all windows (if equipped) are clean.

Secure the doors and the windows in the open position or in the shut position.

Adjust the rear mirrors (if equipped) for the best visibility close to the machine.

Make sure that the horn, the travel alarm (if equipped), and all other warning devices are working properly.

Fasten the seat belt securely.

Warm up the engine and the hydraulic oil before operating the machine.

Only operate the machine while you are in a seat.

The seat belt must be fastened while you operate the machine. Only operate the controls while the engine is running.

While you operate the machine slowly in an open area, check for proper operation of all controls and all protective devices. Before you move the machine, you must make sure that no one will be endangered.

Do not allow riders on the machine unless the machine has the following equipment:

- Additional seat
- Additional seat belt
- Rollover Protective Structure (ROPS)

Note any needed repairs during machine operation. Report any needed repairs.

Avoid any conditions that can lead to tipping the machine. The machine can tip when you work on hills, on banks and on slopes. Also, the machine can tip when you cross ditches, ridges or other unexpected obstructions.

Avoid operating the machine across the slope. When possible, operate the machine up the slopes and down the slopes.

Maintain control of the machine.

Do not overload the machine beyond the machine capacity.

Be sure that the hitches and the towing devices are adequate.

Never straddle a wire cable. Never allow other personnel to straddle a wire cable.

Before you maneuver the machine, make sure that no personnel are between the machine and the trailing equipment.

Always keep the Rollover Protective Structure (ROPS) installed during machine operation.

Monitor the location of mounted components. Ensure that the components do not come into contact with other parts of the machine during operation.

4.5 Exposure to radio frequency (RF) signals

This system uses devices that contain radio transmitters and receivers. The radiated output power is far below the international radio frequency exposure limits. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on the safety standards previously set by international standards bodies:

- American National Standards Institute (ANSI) IEEE. C95.1-1992.
- National Council on Radiation Protection and Measurement (NCRP). Report 86. 1986.
- Int'l Commission on Non-Ionizing Radiation Protection (ICNIRP) 1996.
- Ministry of Health (Canada), Safety Code 6. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

Use of unauthorized or modified antennas may impair signal quality and damage a device, causing loss of performance. To assure optimal performance, and ensure human exposure to RF energy is within the guidelines set forth in the relevant standards, always use a device in its normal-use position.

Maintain a minimum 20 cm distance from radio transmitters when they are in use. Avoiding contact with the antenna area when a device is IN USE optimizes the antenna performance.

4.5.1 Exposure to radio frequency radiation from Bluetooth and WLAN transmitters

Devices are approved as a portable devices with respect to Radio Frequency (RF) exposure compliance. The radiated output power of the internal wireless radio transmitters is less

than 100 milliwatt, which results in exposure levels far below the FCC radio frequency exposure limits, even when operated in close proximity to the body. The internal wireless radios operate within guidelines found in international radio frequency safety standards and recommendations, which reflect the consensus of the international scientific community. Trimble therefore believes the internal wireless radios are safe for use by users. The level of electromagnetic energy emitted is hundreds of times lower than the electromagnetic energy emitted by wireless devices such as mobile phones. However, the use of wireless radios may be restricted in some situations or environments, such as on aircraft. If you are unsure of restrictions, you are encouraged to ask for authorization before turning on the wireless radios.

4.5.2 Exposure to radio frequency radiation from cellular wireless transmitters

Devices equipped with wireless cellular modem radios have been designed and manufactured to meet safety requirements for limiting exposure to radio waves. When used in accordance with the instructions set forth in this manual, the equipment has been independently verified to not exceed the emission limits for safe exposure to radio frequency (RF) energy as specified by the Federal Communications Commission of the U.S. Government in 47 CFR §2.1093. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organization through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

4.6 Telecommunications & Internet Association (TIA) information

Hearing Aids: Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your wireless service provider, or call customer service to discuss alternatives.

Pacemakers and Other Medical Devices: The Health Industry Manufacturers Association recommends a minimum separation of six inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. Persons with pacemakers should use the ear opposite the pacemaker to minimize the potential for interference. Persons with pacemakers should exercise great caution if using a hands-free device such as a headset, as these persons may be at greater risk of the device not maintaining the recommended minimum six inches of separation from the pacemaker. If you have any reason to suspect that interference is taking place, turn the device OFF immediately.

If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn the device OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

4.7 Warnings

WARNING –When replacement parts are required for this product Trimble recommends using Trimble replacement parts or parts with equivalent specifications including, but not limited to, physical dimensions, type, strength and material. Failure to heed this warning can lead to premature failures, product damage, personal injury or death.

WARNING –Disconnect the negative battery terminal before commencing any welding and ensure that power is removed from the grade control system by disconnecting the power input cable or cables. Failure to follow this warning may result in electrical damage to system components.

WARNING – Do not disassemble or modify the product as this may result in fire, electric shock or burns.

WARNING – Do not use a voltage other than the indicated power supply voltage. Doing so may cause fire or electric shock.

WARNING – Do not use damaged cables or connectors. Doing so may cause fire or electric shock.

WARNING – Do not plug or unplug cables with wet hands. Doing so may cause electric shock.

WARNING –Do not weld on or drill into any part of the machine's Roll Over Protection Structure (ROPS) as this could weaken its structural integrity.

WARNING –When transporting machines with removable sensors such as GNSS receivers or UTS targets installed, if the sensor mounting bracket clamp loosens, then the sensor may be dislodged from the machine which may result in injury or death. Always remove and store removable sensors prior to transport.

WARNING –When removing or installing removable sensors such as GNSS receivers or UTS targets, if the sensor is accessed improperly, then a fall may result in injury or death. Always follow site, state or national Health and Safety guidelines when removing or installing removable sensors.

WARNING –The magnets on the magnetic display mount are strong. If parts of your hands get between two magnets when you move them, the magnets may suddenly move and pinch or clamp the skin. When the magnets are close together, position your hands so they are not between the two magnets.

WARNING –If you have a pacemaker and handle the magnetic display mount, the magnet can affect the function of the pacemaker and cause physical harm. Remain at least 30 cm (1 foot) from the magnetic display mount if you have a pacemaker.

WARNING –Before disconnecting electrical components, disconnect the battery cable and attach a Do Not Operate tag in the operator's compartment to inform personnel that the equipment is being worked on. Accidental engine starting can cause injury or death to personnel working on the equipment. To avoid accidental engine starting, place and lock a lock-out box onto the battery terminal.

WARNING –The front linkage may move abruptly and in unexpected directions when you check the connections between the joystick, valve module, and the valve block. This sudden movement could cause injury to anyone near the front linkage. To avoid injury, make sure that there is adequate clearance from people and objects and be prepared to lock the hydraulic functions.

WARNING –If the attachment has a quick coupler and the coupler is not connected correctly, the attachment may come off. This could cause injury to anyone near the attachment. To avoid injury, make sure that the coupler is fully engaged and the mechanism linking the stick and attachment is firmly secured before moving.

WARNING –When Autos are engaged, the system will control movement of the boom and attachment. These movements could cause injury to anyone near the attachment, or damage to the machine. Always put the attachment on the ground and engage the hydraulic lockout before you leave the machine.
Do not use Autos when somebody is working near the attachment or if the ground conditions are unstable. Only use Autos to grade a finish surface. Disarm Autos when you perform other applications, such as lifting.

WARNING –Do not stare into the laser beam when the laser transmitter is operating. For more information, refer to the documentation that came with your laser.

WARNING –The TD5x0 display screen is designed to minimize glare in a wide variety of environments. However, when using the display in direct sunlight, there is still the possibility of sun-strike on the screen leading to loss of visibility.
